Hunting

Defending

Threat researchers need great contextual and hi
Researchers need data that reveal the underlyin
procedures (TTPs) of threat actors.

Our Data

The data you need to find what you're looking for

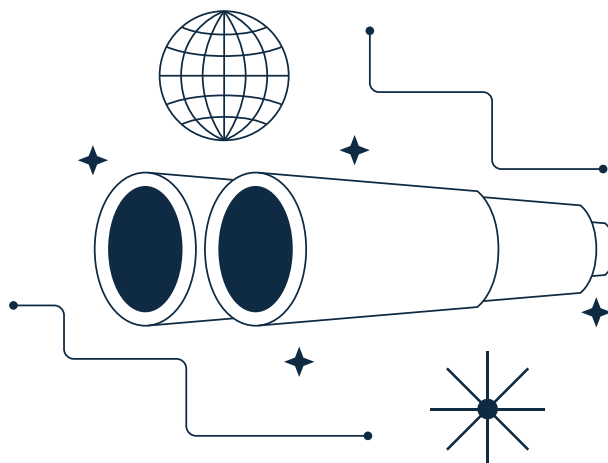

- Lookalike domain feeds
- DNS
- Full URL crawls
- Certificates - passive and active collection
- Registration
- Contextual enrichment through OSINT sources

How we get it

Scout

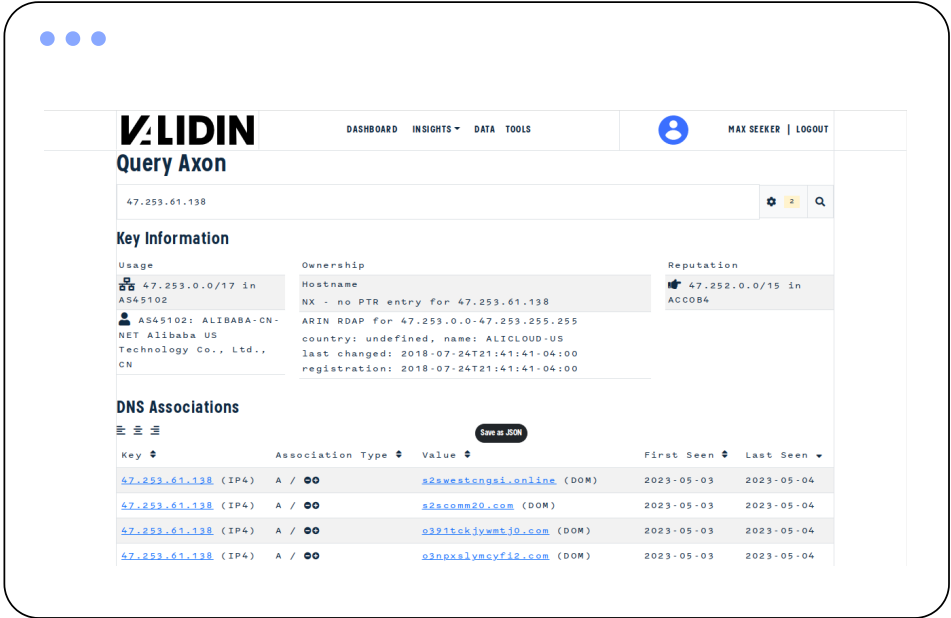

Monitors hundreds of sources of domain and IP intelligence, tracking changes and additions over time. Provides rich contextual information for indicators.

Swarm

Serj

The Validin Platform

We designed our platform to leverage our data and reinvent threat research. Say goodbye to query engineering and throttled results.

Breakthrough Performance

Our state of the art indexing technology provides clients with unprecedented querying speed and performance.

Search Flexibility

Run complex searches and get results in seconds with full customization to get exactly the results you need

Dynamic Access

Use our interface, connect via API, or buy feed reports. Whatever your use case, we have the deployment strategy for you.

The perfect solution for MSSPs, SOC Teams, and Threat Researchers
